Planning Energy for a Sustainable World

Leading Innovation

In High Voltage Power Systems

PPA Energy is one of the UK's leading energy consultants. PPA Energy's team comprises a group of highly experienced professionals specialising in techno-economic and management consultancy services for the energy sector.

PPA Energy provides creative in-depth insight, experience, research, innovation and independent expert advice to major businesses - such as those owning, operating or regulating energy, low carbon energy, electricity, gas, water, rail and telecommunication systems, networks and infrastructure

- including manufacturers, suppliers, research universities, regulators and other key stakeholders with projects in Europe, South America, Africa, Middle East and India.

PPA Energy work with a wide range of Universities, Manufactures and Utilities on High Voltage power systems, understanding the key business drivers, envisaging solutions and bringing together collaborative consortia to create real solutions for the most challenging problems.

Current high voltage innovation projects include:

Real time Intelligent Condition Monitoring and Diagnosis for:

- Underground cables
- Overhead lines
- Switchgear
- Transformers

Distribution and Equalization applications for Power system Electronics

Equalisation Networks for both City and Rural networks

System loss measurement and location

Smart network concepts and demonstrations
